- To comply with Company HACCP, Quality Manual, Health & Safety Policy and Operating Procedures at all time.
- To respond to any production-related activity involving any plant or machinery.
- To carry out any planned maintenance tasks as directed and to the required standard in line with company and industry standards.
- To participate in site-wide operational projects, for example installation of new equipment and plant, de-commissioning of machinery or other project-based activities.
- To complete any necessary administration processes to the required standard.
- To operate a clean as you go policy, ensuring full compliance with food hygiene standards.
- To act in a professional manner in relation to visitors or customers.
- To carry out any duties requested in a willing and helpful manner.

Skills & Experience

- Time served engineer ideally with in food manufacturing environment who is working towards or has in-depth knowledge of 16th or 17th edition, who ensures Good Engineering Practice is applied throughout all site activities.
- City & Guilds 2391/2394/2395 Electrical Inspection & Testing Certificate
- A minimum of five years' experience in an operating engineering environment.
- Experience of a multi-skilled engineering environment preferably within Dairy/Beverage industries.
- Thorough knowledge of Packaging machinery, ability to perform PAT Testing, Emergency Lights.
- You must be able to demonstrate your knowledge of Inverters.
- Ability to troubleshoot and fault find.
- Competent with single/three phase and low voltage control applications and installations.
- Excellent written and verbal communication skills and familiar MS Office products.
- Ability to work effectively in a fast-paced multi-tasking environment.
- Ability to work individually as well as within a team across all functions on site, demonstrating a 'can do' and 'flexible' attitude and approach towards the business requirements.
- You must have an eye for 'Continuous Improvement' and have previous experience and be able to demonstrate plant improvement and production efficiencies.

The role will be based at our Halstead facilities.
